# Resilient Arthroscopes

C-Mount Scopes

# Arthroscopes

4mm Arthroscope  
502-477-011

The 4mm arthroscope is designed to provide a high resolution picture while displaying the maximum amount of light available. The 4mm arthroscope is available in multiple angles of view and various lengths.

2.7mm Arthroscope  
502-343-030

The 2.7mm arthroscope offers versatility and maximum durability as it is offered in standard and stubby lengths. With increased brightness and image quality this small-joint arthroscope is ideal for a variety of procedures.

2.7mm Stubby  
502-343-030

The Stryker 2.3mm small-joint arthroscope provides a brilliant image and optimal brightness.

2.3mm Arthroscope  
342-032-001

The 1.9mm small-joint arthroscope is designed and held to the same standards of durability as all other Stryker arthroscopes. The smaller diameter offers the ability to perform the most delicate small-joint procedure without sacrificing image quality and brightness.

1.9mm Arthroscope  
502-142-010

# C-Mount Arthroscopes

4mm Autoclavable C-Mount  
502-527-030

The 4mm autoclavable c-mount arthroscope is hand crafted to provide a durable arthroscope that produces a brilliant high-resolution image with optimal light output. This arthroscope also reduces fogging by connecting directly to the camera head.

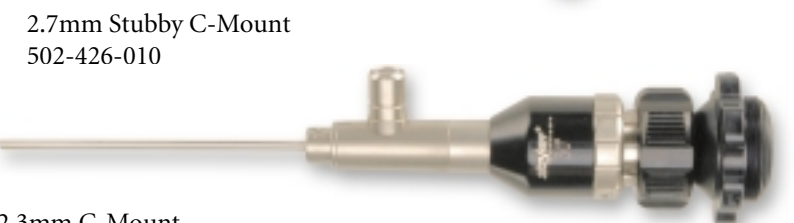

4mm C-Mount  
502-427-010

The 4mm c-mount arthroscope screws directly into the camera head to protect the camera lens from any moisture that could reduce the clarity of the image. The optical system within this arthroscope provides an ample amount of brightness and helps produce a magnificent image.

2.7mm C-Mount  
502-428-010

The 2.7mm c-mount is a versatile arthroscope that may be used in multiple small-joint surgeries. With standard and stubby sizes this small-joint arthroscope puts a clear and bright image on the screen while connecting directly to the camera head to reduce fogging on the camera lens.

2.7mm Stubby C-Mount  
502-426-010

The 2.3mm c-mount arthroscope connects directly to the camera head to reduce fogging and is ideal for many small-joint surgeries. This reliable arthroscope produces a clear image and an optimal light output.

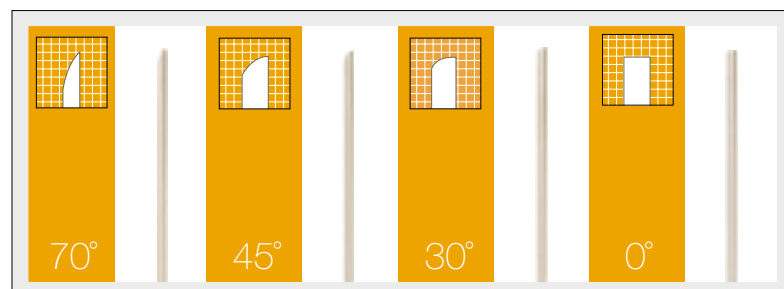

2.3mm C-Mount  
425-031-001

The 1.9mm c-mount arthroscope screws directly into the camera head and was designed for the most intricate procedures such as TMJ surgery. Durability of this small-joint arthroscope is in no way sacrificed for image quality and brightness.

1.9mm C-Mount  
502-424-010
