FlexVision™ U-500
Flexible Ureteroscope

FlexVision™

On the Inside Tract

Sophistication

Superior resolution, deflection, and durability unite in the Stryker Flexible Ureteroscope to provide outstanding visualization and lasting workability. Applying the precision of increased fiber optic bundles, the FlexVision™ U-500 is the market frontrunner in resolution. The latest in flexible optics technology offers surgeons a powerful method to access and visualize the entire kidney, especially the lower pole.

Merging the matchless clarity of the FlexVision™ U-500 with the standard-setting Stryker High Definition camera will provide an unrivaled visual image in the operating room. Urologists will find the Stryker Flexible Ureteroscope an exceptional tool by which to raise the bar in their procedures.

Matchless Clarity

Detailed brightness in the smallest spaces enhances visibility and increases performance during procedures. By joining the forces of the FlexVision™ U-500 with the Stryker Camera System, a surgeon is equipped with the finest tools available to complete complex operations.

Intuitive Design

The lightweight and ergonomic form of the FlexVision™ U-500 makes ureteroscopies simpler and more comfortable. Combining smooth deflection buttons with a sleek handle offers a firm, dependable grip during procedures. During secondary deflection, a locking mechanism allows the hand to rest while accessing the lower pole.

FlexVision™ U-500 Features

- » 6.9 Fr distal tip provides non-invasive access.
- » 3.6 Fr working channel for optimal treatment and fluid management.
- » 275° tight radius deflection.
- » Increased fiber optics for high resolution.
- » Reinforced proximal end for axial stability and greater surgeon control.

Superior Deflection

Optimal accessibility is provided in both kidneys through primary and secondary deflection to both sides. Kidney treatment is made possible by way of dual deflection with a tight radius, allowing an excellent view of the upper and lower poles.

Dual Deflection Up

Dual Deflection Down

Ordering Information

FlexVision™ U-500
503-888-000

The following products are included:

Cleaning Brush
503-888-003

Lens Cleaner
503-888-004

Leak Tester
503-888-005

Port Seal Valve (1 pkg/5)
503-888-001

Shipping Case
1000-000-079

Optional Accessories

Sterilization/Storage Tray
233-032-800

Baskets

Stryker also provides a complete line of Disposable Baskets. Please contact your local Stryker Representative for selection and pricing.

Joint Replacements
